Microsoft 365 Groups

Agenda

Microsoft 365 Groups Overview

Microsoft 365 Groups

Powering Collaboration Across Microsoft 365

Share knowledge and information using email, calendaring, documents and more

Enable communications in a secure and controlled manner

Streamline the creation and use of collaboration features

Leverage self-service capabilities to reduce costs and save time

Microsoft 365 Groups: Overview and Architecture deep dive - https://aka.ms/Admin1017

Microsoft 365 Groups by the numbers...

191%

Annual increase in usage across Groups platform

180%

1-month COVID-19 usage spike to connect with family & friends

7.5M

Guests active through Microsoft 365 Groups

1,268

Organizations use sensitivity labels with Groups

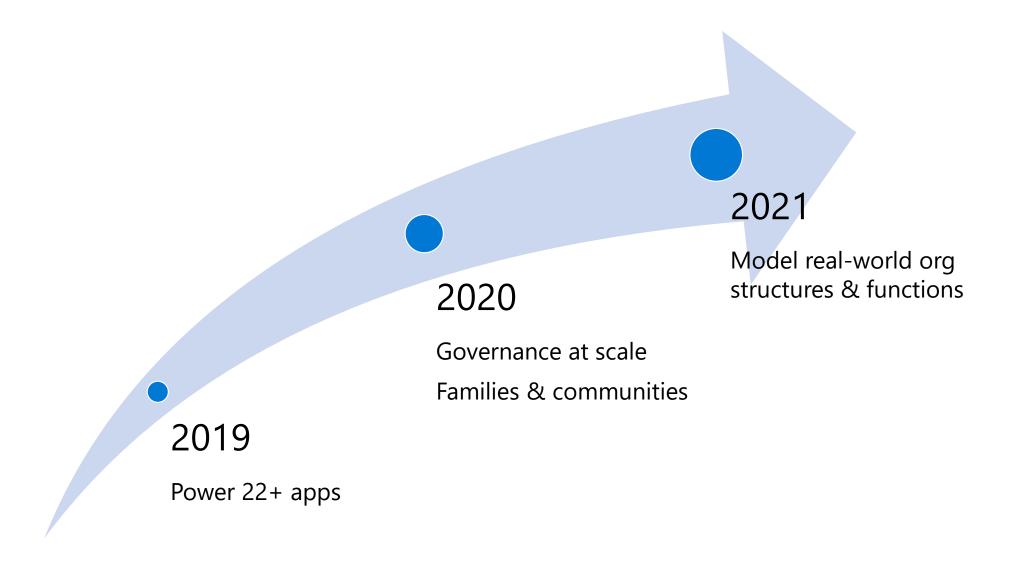

160K

Groups with sensitivity labels

79%

Groups auto-renewed due to highvalue activity

Evolving the Microsoft 365 Groups Platform

Microsoft 365 Groups

One Platform for Your Whole Day

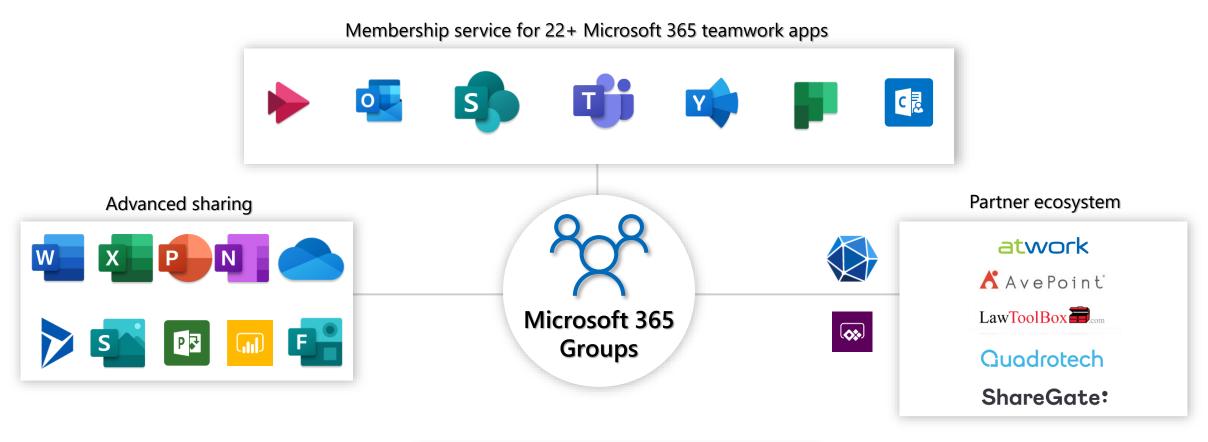

Work School Far

Family Community

Groups power apps that bring together people and the resources they need to achieve more

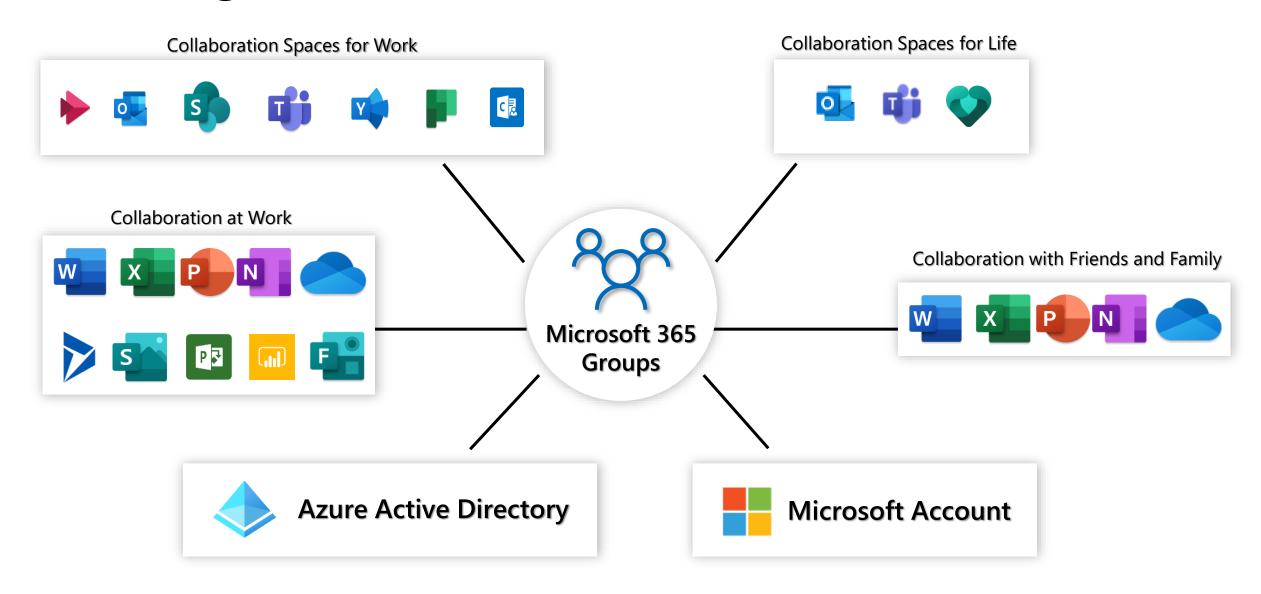

Powering collaboration across work and life

Centrally managed, secured, and governed

Powering collaboration across work and life

Office 365 Groups roadmap presented in Ignite 2019 Microsoft

- ✓ Microsoft 365 Groups classification using Microsoft Information Protection Labels (General Availability)
- **✓** Expanded capabilities for Groups Administrator role
- ✓ Additional Microsoft 365 admin center enhancements
- ✓ Improvements to Dynamic Groups at scale (*Private Preview*)
- ✓ Information Barrier support for Microsoft 365 Groups (*Private Preview*)
- ✓ Native Mode for Yammer

Group driven membership (Open-sourced group membership management tool)

Microsoft 365 Groups Innovations

Microsoft 365 Groups Innovation

Recent Highlights

Governance

- Microsoft Information Protection Labels general availability
- Information Barrier support in Microsoft 365 Groups
- Microsoft 365 admin center support for exporting groups, editing email address, etc.
- Convert internal users to guest users
- Ownership governance

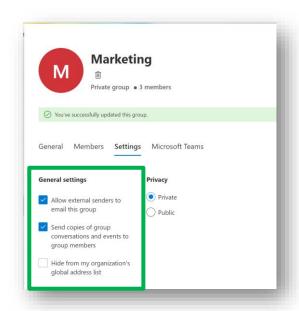

Management at Scale

- Improvements to **Dynamic Groups at scale**
- Dynamic Membership rules validation
- Yammer All Company backed by Microsoft 365 Groups
- Support for Application
 Authentication in Microsoft
 Graph
- Assign Azure AD Roles to Microsoft 365 Groups

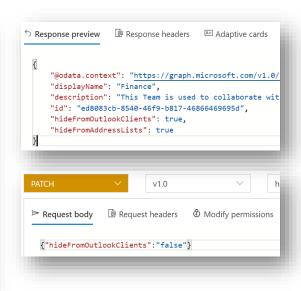

Work and Life

- Microsoft 365 Groups rebranding
- Alignment in group creation experiences
- Outlook desktop classic message view
- Groups for Outlook.com
- Teams for personal use

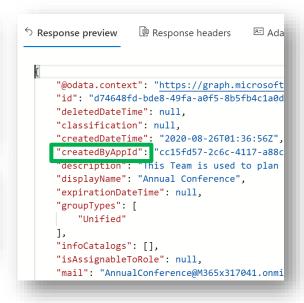

Groups Enhancements in Microsoft Graph

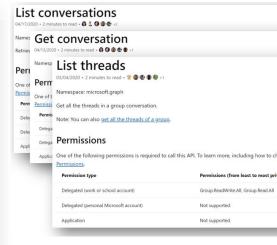

Properties mastered in Exchange Online can now be modified without an Exchange license

Hide and show groups with new properties:
hideFromOutlookClients
hideFromAddressLists

Group creation source populated in createdByAppID for all 1st and 3rd party registered apps

Application Authentication supported on conversations APIs for Group.ReadWrite.All and Group.Read.All

https://aka.ms/exchangeproperties

https://aka.ms/hideFromOutlookClients

https://aka.ms/CreatedByAppID

https://aka.ms/AppAuthGroups

Improvements to Dynamic Groups at scale

Challenges

Performance

Time to process group is relative to size of tenant

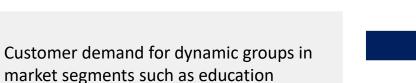

Tenant processing and group update is slow and can take up to 24 hours

Scalability

Single object failure blocks whole tenant processing

In case of machine failure, tenant processing is blocked

Improvements

Time for new group creation is **proportional to the size of group**

Deliver **SLA** in minutes for dynamic group membership updates. Optimized performance for these operators: -eq, -in, -startsWith

Single object failure won't block tenant processing

Other objects will continue to be processed

If one machine fails, other machines will pick up and continue tenant processing

Support for 5,000 dynamic groups per tenant

Increased size of dynamic group extended to 10K+ members
